1. Claims 1, 2, 6-11, 13, 14, and 16-18 are pending in the instant application.

Claim Objections

2. Claims 1, 2, 6-11, 13, 14, and 16-18 are objected to because of the following informalities:

Regarding claim 1, in line 4, "the current demodulated bit" is lacking antecedent basis, in line 8, "the selected threshold value" should be replaced by –the selected threshold level--, and, in line 9, "a selected value" should be replaced by –the selected value--. Further, one is unable to determine if the intermittently integrating of line 11 further limits the intermittently integrating step of line 6 or if it is a subsequent exclusive step.

Regarding claim 6, in line 2, the additional oversampling step conflicts with the oversampling of parent claim 1, in line 2, "the samples" is lacking antecedent basis, and, in line 2, one is unable to determine how the additional integrating step coincides with the integrating step of the parent claim.

Regarding claim 8, the claim is objected to because it fails to further limit parent claim 7. That is, the subtracting step in the claim is already performed in claim 7, and one is unable to determine how the additional subtraction should limit the parent claim.

Regarding claim 9, in line 2, "adjusting the responsiveness" should be replaced by –adjusting a responsiveness--.

Regarding claim 10, in line 4, "current and (n-1)" should be replaced by –current (n) and (n-1)--, in lines 6-7, "the selected preset default value to produce a dc offset"

Application/Control Number: 10/015,848 Page 3

Art Unit: 2638

should be replaced by –the selected preset default threshold value to produce a current dc offset--, in line 9, "to remove the effects" should be replaced by –to remove an effect--, in lines 9-10, "a demodulated signal" should be replaced by –the demodulated signal--, and, in line 11, "the responsiveness" should be replaced by –a responsiveness--.

Regarding claim 11, in line 2, "a selected threshold" should be replaced by -the selected threshold--.

Regarding claim 13, in line 8, "a demodulated bit stream" should be replaced by —the demodulated bit stream—, in line 9, "of the order of" should be replaced by —on the order of—, and, in line 11, "the demodulated signal" is lacking antecedent basis.

Regarding claim 14, in line 2, "a demodulated bit signal" should be replaced by — the demodulated bit signal--, and, in line 4, "bit rate periods" should be replaced by —bit periods— and "the result" should be replaced by —a result--.

Regarding claim 16, one is unable to determine if the further means for oversampling is additional to the means for oversampling of the parent claim.

Regarding claim 17, one is unable to determine if the further means for selecting is additional to the selecting means of the parent claim.

Appropriate correction is required.

Allowable Subject Matter

The indication of allowable subject matter is made with respect to claims 1, 2, 6-11, 13, 14, and 16-18.

Conclusion

4. This application is in condition for allowance except for the following formal matters:

The claim objections above.

Prosecution on the merits is closed in accordance with the practice under Exparte Quayle, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO**MONTHS from the mailing date of this letter.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason M. Perilla whose telephone number is (571) 272-3055. The examiner can normally be reached on M-F 8-5 EST. The Applicant is requested to contact the Examiner before the issue of the reply to this office action to discuss allowable subject matter in this case.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kenneth Vanderpuye can be reached on (571) 272-3078. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Application/Control Number: 10/015,848

Art Unit: 2638

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
